

Air1 serves me as a resident of my local community by offering me a clean & wholesome commercial free alternative to secular radio that is filled with filth. The effect on my local community if Air1 were to be displaced by an LPFM broadcaster providing other programming would take away a place to hear clean family orientated music with no filthy commercials.

I believe that the service provided by Air1 is in the public interest because we need choices. We need the option to listen to clean & wholesome radio that is family oriented. Most secular commercial radio stations play music filled with hate, sex, drugs & violence.

Please do not take away Air1!
